STARDOG VOICEBOX

AI Data Assistant for Financial Services

No Code. No Dashboards. No Hallucinations. Just instant answers and insights for everyone.

Stardog Voicebox is the World's First Hallucination-Free AI Data Assistant Powered by a Knowledge Graph

Stardog Voicebox generates 100% accurate and hallucination-free responses — providing business leaders with insights that are accurate, fast, secure and easy to access.

Stardog simplifies the data ecosystem, enabling users to quickly access information, and use it to optimize key programs and improve customer outcomes, all while reducing risk across the firm.

Financial services companies are uniquely positioned to leverage Stardog technology to optimize output, reduce risk, mitigate fines, create compliant generative AI solutions, and more.

We've helped a wide range of financial services organizations around the world realize significant value from our technology.

No AI strategy without data strategy

Firms need AI with security, privacy, and accuracy. Safe AI hinges on data quality and establishing guardrails.

In a highly regulated industry, navigating the amount of ever changing data, identifying risk impact and meeting compliance requirements is complex and challenging. Data at Financial institutions is often fragmented and siloed which makes deep insights difficult and costly to obtain. Current GenAI Solutions are hallucinating and don't provide traceability for regulatory compliance.

Voicebox = **Knowledge Graph** + **Conversational AI**

Unify your data assets to reduce risk, increase revenues, and improve business outcomes.

Streamlining Operational Risk Operations

The Stardog Solution

- Uses visualization and query execution technology to analyze Operational Risk data.
- Makes financial data more accessible to risk analysts through ontologies.

The Impact
A public G-SIB/G-SIFI saw technology ROI in the mid 6 figures, and operational ROI over 3MM per year.*

Monitoring Shareholder & Regulatory Disclosures

The Stardog Solution

- Provides a foundation for optimized regulatory reporting.
- Connects a complex IT data ecosystem to simplify reporting and build data confidence.

The Impact
A global private bank saw significant reduction in regulatory fines, simplified BI development, streamlined M&A processes. figures, and operational ROI over 3MM per year.*

Managing Legal & Compliance Information

The Stardog Solution

- Provides a search web application for data repositories housed within Legal & Compliance.
- Makes legal data from all sources discoverable for analysts, IT, and compliance.

The Impact
A public G-SIB/G-SIFI saw annual savings of ~8500 hours, generating cost savings of 1.5MM-2.5MM.*

Fraud Detection & Know your Customer (KYC)

The Stardog Solution

- Provides a foundation for discovering duplicate accounts and identifying suspicious transactions.
- Enables business units to obtain a uniform view of aggregated data for regulatory purposes.

The Impact
A global private bank saw enhanced data discovery and exploration, reduced complexity, minimized fines and other legal and compliance issues.

Compliance Risk Management

The Stardog Solution

- Provides a managed platform for identifying, assessing, and reporting on compliance risk.
- Enables streamlined generation of multiple forms of reports, including data extracts and visualizations.

The Impact
A public G-SIB/G-SIFI simplified reporting management, significantly reduced regulatory risk.

Technology Asset Search & Mapping

The Stardog Solution

- Creates a search and exploration application for all technology assets.
- Makes data more discoverable across disparate silos to streamline management of assets.

The Impact
A public G-SIB/G-SIFI saw annual savings of ~17,000 hours, generating an estimated cost savings of 3MM-5MM.*
